

■ Emollients – Liquid Butter

INCI NAME: BUTYROSPERMUM PARKII OIL

LIPEX[®] SheaClear[™]

This clear and low-spreading oil with moisturizing and conditioning benefits is ideal for creating translucent and transparent formulations.

Lipex SheaClear is a low-spreading oil that offers all the skin-softening and soothing benefits of shea butter in an easy-to-use, clear liquid form. It is suitable for low energy processing and for formulating all types of transparent and translucent cosmetic oil applications.

Recommended applications: all cosmetic applications

Appearance: slightly yellow liquid, clear at room temperature (25 °C)

Cloud point: 18 °C

Slip melting point: 12 °C

Certifications: China Compliant, Halal, Kosher, Vegan-friendly

LIPEX[®] SheaClear[™]

Key features and benefits:

- Clarity at room temperature makes this ideal for skin, hair, and face oils where absolute transparency or minimal color is desired. While shea penetration remains significantly lower than the overall category, its moisturizing and skin-protecting benefits are highly valued—creating new opportunities for cleansers, serums, beard care, and other oil-based skin care products.
- Studies show that in most cases, up to 25% of LIPEX SheaClear can be incorporated into formulations while maintaining clarity at temperatures of 15°C and above.
- Lipex SheaClear contains a higher concentration of bioactive triterpene esters compared to refined shea butter. Triterpene esters, minor compounds naturally found in shea butter, are known for their skin-regenerating and protective properties. While refined shea butter typically contains 2-6% triterpene esters, all our AAK liquid shea butter variants offer an enhanced content of 9.5-11.5%.
- The liquid, pumpable format results in more efficient production. Lipex SheaClear can be incorporated easily into formulations, and is suitable for cold or low energy processing, leading to energy and time savings. However, if stored in cold conditions, slight heating may be required to remove precipitation.

Liquid shea saves time and energy compared to solid shea butters

Formulation suggestions:

SKIN CARE

Luscious Age-defying Oil Serum

AAK-15-280

Pure Start Dual Phase Cleanser

AAK-15-310

Shea Innovations Pampering Body Mist

AAK-19-002

LIP CARE

Scarlet Starlet Lip Oil

AAK-24-010

HAIR CARE

Shea Clear Hair Oil

AAK-15-300

Sleek and Wet Glam Gelée

AAK-24-023

Typical use concentrations:

2–25% for skin care oils
1–25% for hair care oils
1–25% for shower oils
